The internet let's get into that  
Let's talk about the way that we all connect

Whos playing at the gigs who coming the shows  
Whos making tracks doing that (fuck knows)

Sshh it's just a website  
You really need to get it in your head like  
Head lice I'm dead right a NED write  
Some songs and put them on the net like  
There you go have free stuff  
Now it's on the net that you love so much  
Tut tut not my first choice  
But it is one way you can hear my voice so  
Cunt go away 'Alt' 'f4'  
All that I said I said before  
What B4 you sunk my battle ship  
Get it right I don't do the battle shit  
I get the mic and I'm batting it I batter it  
No homo but this mic I am shagging it  
Murder bagging it deceased tagging it  
Spraying on the track and attract like a magnet

Now every body wants to go and be on the my space  
But what they just fail to realize is that most of it fake  
Bunch of friends they ain't friends  
They just people that pretend  
You should know that you won't make it if you just rely  
just on them  
Get outside get a life  
Don't just write go get a mic  
What's your problem why you stopping  
Did you realize you are shite cunt
