This is the church where Black Flag lives  
Sentiments are born of desperation  
Where good thoughts come from  
Monuments in futility  
Stress and anger, passion and humility  
But we're above thumbs

This is the church where black flag resides  
There's no profit, no success, just pride

Nil by mouth with prophetic paint  
Autistic license, we're always poor and hungry  
Art just doesn't pay  
Finding beauty in ugliness  
Compulsive strides are pensive and second best  
This is on our chests

This is the church where black flag resides  
There's no profit, no success and we're tired  
We're tired!

This is the church free of cognicide  
There's no profit, no success and we're tired,  
In the church where Black Flag resides  
There's no profit, no success, just pride
