

Western Heritage "California State Of Mind"

Visit "[California State Of Mind](#)" on MotoLyrics.com

I think I finally found a California
state of mind and it feels fine
been facing west now for so long
and a million surfers can't be wrong

Chorus
California please let me stay
California don't go away

Think there's only one way to describe it
and I'm digging these vibrations
I said its electric
and its turning me on

Chorus
California please let me stay
California don't go away

And Oklahoma's really not that far

but it feels like worlds apart
and sometimes, sometimes you need that coast
I said sometimes, sometimes oh you need that coast
oh you need it so close

I think I'm finally ready to surf those waves
cause its the only thing in between endless harmony

Chorus
California please let me stay
California don't go away
California please let me stay
California don't go away
