Ohh where have you been I've been missing you
I really been missing you
How am I gonna prove, this ain't no lie
This is all for real, this is how I feel inside
Slap my face I've just received a wake up call
Seen the meaning of it all
It sucks but how it's real
I feel, no wonder I'm in vain
Everthing it's true, this song was ment for you

Chorus:

Ohh ohh I
I guess I got scared but I went out and there
well you know me, well you know me
I guess I got scared but I went out and there
Well you know me, well you know me

It's the fool in me that forgets everytime
It's the state of concheince that makes me go blind
We are both the passionate one left behind
We are gathered here
