Black ones above us  
Like eye of god like hand of fate  
Black ones above us  
Watching, searching, infiltrating

From nowhere they came  
From stars of hate  
New, strongest opponent  
In this game  
Soulless black monsters  
No longer you'll be anonymous

Black monsters like eye divine  
Black monsters silent assassination

DNA code scanned, samples of you  
Data base of human race  
No emotions just bio-tech  
For brain just organic computer

You'll hear them like bass string  
You'll see them like giant dragonflies  
Highest tech for highest targets  
To infiltrate and exterminate danger

Our race
