Far in dark stars
Eons before the Christ
Alpha numeric code
Before knot writs
Time tunnels in earth and sky
Before fire melts great ice

Better source of code
To rule the earth to control

Gen-code from the unknown
DNA string divine code

Better source of code
To rule the earth to control

Sterilized labs on planet x
Same ones in caves under the earth
Gen-code DNA created to be modificate
Multiplified chains hybrid of gods earth shape

No reason we believed in apes
As first incarnation of man
Gods had unknown better matrix
Better source of code
To rule the earth to control

Gen-code from the unknown
DNA string divine code

Nowadays on planet earth
Century the 21st
After dark years alpha numeric code
No one understands
Secrets of creation of man...
