

## Whichheaven "Flash"

Visit "[Flash](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Flash the sky fire  
One moment change everything into dust  
Steel angels from agelessness  
Sneak attack - total conquer

No remorse the earth must burn  
Annihilation living dead

Colonization growing new man  
On the graves grew new race  
One flash of our end  
That flash that make us dead

Annihilation living dead  
Radiation new quality man  
The conquer universe changes  
One flash and everyone is dead  
Just sand skeletons of shelters  
Our faith seems so hopeless  
Suffering become endless  
New race on the graves of earth

Alienation through experiments  
New salvation new quality man  
Two hands one head new brain  
New orders man become a slave  
Galaxy not far as ago  
New master's full control  
One flash to burn our souls  
One flash to made the earth blows
