This house will be your prison until the morning light
Comes to free with feeling of uncertainty We may
never know what we might have been But at least you
saved yourself from the anxiety You've memorized
your lines so well, Well I guess I've learned to play my
part with a certain subtle ease Concentrate on
television, sleeping pills, or lying still But I have to know
the cause if I'm to cure the disease Recess; reach the
edge of consummation Without warning turn and walk
away Recess, past the point of consolation With a
warning turn and walk away. Turn and walk away. But I
have to know the cause if I'm to cure the disease Have
to know the cause, have to know the cause. Recess;
reach the edge of consummation Without warning turn
and walk away Recess, past the point of consolation
With a warning turn and walk away. Learn and walk
away. This is resignation; I resign myself not even try
This is hesitation and I know it will never satisfy.
