I'm so happy you called  
I really needed a break  
From all the people I see  
All the people I spend time with

Where did my summer go  
The week that was canceled  
Was my only chance  
To get out of this place

So how have you been  
I heard about your problem  
At the end of this road  
A common solution

My favourite thing about you  
Please don't get me wrong  
How natural it feels  
Five Minutes without talking  
Five Minutes without talking
