Two years have past and I'm on the road again  
Traveling fast to catch up to Morrison  
And your hazel eyes they come back to haunt me  
But it's no surprise cause all that I'm wanting is you

And you don't know how easy it is when you're around  
(When your around)  
And all this time I was looking for ways to say this right  
(Say this right)

I get the feeling you won't be around  
Cause I should have stayed and time should have  
slowed down  
And I miss your kiss and that awkward smile  
And all that I miss is you travel miles away  
It's too late

You don't know how easy it is when you're around  
(When you're around)  
And all this time I was looking for ways to say this right

What makes it different this time  
Lets retrace our steps back to the night that you said I  
love you  
I love you  
(I love you)

You don't know how easy it is when you're around  
(When you're around)  
And all this time I was looking for ways to say this right

What makes it different this time  
Lets retrace our steps tonight
