I can hear it in the wind  
And when we are together  
I can feel it  
There's something in your smile  
That I cannot seem to find but I just need it

Maybe it's just time for me to tell you  
All the stories I've been keeping  
Call it love  
But I can tell you I don't know the meaning

I wanna know what it's like to be loved by  
The road ahead is long enough for me  
To figure out what feels right

The sun is going down  
And I can see it in your eyes it's been a long day  
I promise I'll be here for you  
Until you wake tomorrow is a new day

Maybe it's just time for you to tell me  
All the secrets you've been hiding  
Cause I could see it in your eyes  
You've waited so long for the right thing

I wanna know what its like to be loved by  
The road ahead is long enough for me  
To figure out what feels right

And the sun is brighter  
When you are alone with me  
When its night time  
You're the only one in my dreams  
But you can't see me

I wanna know what it's like to be loved by  
The road ahead is long enough for me  
To figure out what feels right  
It's only a matter of time
