[Verse 1 (Will Smith)]

Uh, check, check

Yo, yo, yo

Across the room shared a little gaze with me

Crazy mama how your scent played with me

Eyes never hiding your heart angelic looking

Faking disinterest but I can tell you're looking

Face to face her eye to eye stance with me

Didn't even say nothing I felt you wanna dance with me

You push me back a little when I kissed your hand

Said you was attracted to me truly but you had a man

I put my finger up (Shhh) don't say nothing

He ain't here is he? We can play or something

He at the crib oh, I see you live with him

What you gone get married to him and have some kids  
with him

Us could be just a weekend thing

just a weekday thing, just a thing ma

Look we can have everything else

But for tonite let me have you for myself

Girl holla at me

[Chorus (Tra-Knox)]

You can have the rest of your life

Give me tonite

You can have the rest of your life

Give me tonite

You can have the rest of your life

Just give me tonite

You can have the rest of your life

Just give me tonite, give me tonite

[Verse 2 (Will Smith)]

Whoop! Whoop!

Big Will coming through like

Whoop! Whoop!

Tra-Knox coming through with

Whoop! Whoop!

East girls off the hook ain't they

Right, right

[Tra-Knox]

Baby girl  
You know exactly what I want  
No I'm not tryna replace your man  
I just want one night to you all over  
Baby girl  
This our secret rondevue  
Look in my eyes I'm telling you  
All I'm tryna do is change your view  
For a moment or two  
Baby girl  
I don't wanna break up your happy home  
Baby I don't wanna be alone  
So let me jump in the zone  
Can't you feel the Jones

[Chorus]

[Verse 3 (Will Smith)]

Thinking of living your life as a hundred yards long  
Give me a quarter-inch that's all I'm asking  
Do the math I'm the sun you the earth  
It's U-N-I-verse and it's the worst  
Cuz I thirst to tape connect her  
I know you got a life momma  
Trust me I don't wanna bring your life drama  
I can barely hear my think slide with me  
Dip out the side door take a ride with me  
Let me hear about (Uh)  
What you think about (Uh)  
What you need to do (Uh)  
The things you dream about (Whoop)  
Your Body with me but I know where your heart's at  
[Phone rings] Let it ring ma call him back  
Wishing I could stop the clock to make it last with you  
Am I gon' be at home alone with a glass slipper  
Is it a sin to pretend with another fella Midnight the  
story ends like Cinderella [Chorus X2]
