Wrapped up in the night
Suddenly I'm so small
There's no focus but the stars

All that is made by man
Melts and disappears
I have never seen so far

Everything is still
The universe surrounds me
I'm held against my will

I'm falling
I'm falling... again
I'm falling
I'm falling... again

Letting go of gravity
I'm carried on the breeze
Floating gently through the clouds

Each crystal drop of rain
Dances on my skin
My heart is the only sound

Everything is still
The universe surrounds me
I'm held against my will

I'm falling
I'm falling... again
I'm falling
I'm falling... again
[Repeat]
