"And So You Will My Love"

The music stopped
The crowd is thinning now
One phase of night
Has reached an ending now
And nothing
Nothing lasts forever
Except forever

And you my love
And so you will my love

The street is dark here
While I walk along
And since you've gone
I always walk alone
Cause nothing

Nothing lasts forever
Except forever

And you my love
And so will you my love

The dawn and I
Arrive at home at last
Night turns it's lonely face
Toward the past
Cause nothing lasts forever
Except forever

And you my love
And so will you my love
