Beyond reality in flames of desire  
I watch you die in another life  
We danced around in silence  
Only deamons sang our song  
Together we were bound for eternity  
On the eternal path we walk, in the endless night we  
dwell  
Blinded by ominous souls.

We were born to face another life!

[Chorus]

Come and join us and be the guardians of the night  
Followthe ancient ones into the Valley of the Lost  
Come and join us and be the guardians of the night  
Followthe ancient ones into the Valley of the Lost

I gazed at the sky, who am I now?  
Screaming of pain, anger and hate!

[Chorus]

Come and join us and be the guardians of the night  
Followthe ancient ones into the Valley of the Lost  
Come and join us and be the guardians of the night  
Followthe ancient ones into the Valley of the Lost
