Wake up  
She wakes up, it's early in the morning  
She looks around, everyone is still asleep  
An empty dream, it's there where they're living  
Wake up now, your life has just begun

Remember when you used to be a dreamer?  
And you could see the fairies and the angels?  
Nothing has changed, magic's still inside you  
Believe in this, and it will be all around

I will never leave you alone  
I am by your side

We are superheroes  
We can save the world together  
Take my hand  
Say you wanna believe again  
Life is what we make it  
Just stop thinking it's a dream  
And feel alive  
Bring the magic back in your life

Just make a wish  
Don't need a falling star  
It will come true if you open up your heart  
You've always known you really are a fairy  
Take to the sky, show me your inner light

Make the people smile again  
You can heal their hearts

We are superheroes  
We can save the world together  
Take my hand  
Say you wanna believe again  
Life is what we make it  
Just stop thinking it's a dream  
And feel alive  
Bring the magic back in your life
