### "Already There"

Visit "[Already There](#)" on MotoLyrics.com

Wherever you go, I will be there  
Wherever you are, I'm already there  
Whenever you call  
Before you fall  
Before you can ask,  
Before your past  
You were already in my plan

If you were to rest in a secret place  
Where no one could find your hideaway  
I'd be your night  
Light for your day  
In your solitude  
I am with you  
Before your journey began

I'm already there whenever you call me  
I'm there before you call me

I'm already there whenever you call me  
I'm there before you call me

I am the IS who was to be  
Among the oracle wise, they spoke of me  
From age to age  
In the stillness of time  
The dark about me  
No one can find  
Because I have not disclosed it to man

I'm already there whenever you call me  
I'm there before you call me

I'm already there whenever you call me  
I'm there before you call me
