"Bad Frequency"

Visit "[Bad Frequency](#)" on MotoLyrics.com

I miss (mix) your signs
You talk to me in double tongue
You tell me one thing
And follow with another one

I can't rely on
Anything I understand
I keep on hearing
Frequencies in different bands

Why should we create these vibes?
Talking past each other's minds

Sometimes I say things
In hopes to amuse you
Distorted kilohertz
They instead confuse you

You can't depend on
Everything you hear or see
Because it's wrapped in
Levels of bad frequency

Why should we create these vibes?
Talking past each other's minds

Do you hear me now?
Do you get it now?
Should I say it loud?
What about now?

Maybe I can talk to you
And you can respond to me
I just hope we understand
Even through bad frequency

Maybe I can talk to you
And you can respond to me
I just hope we understand
Even through bad frequency

We've got, we've got, we've got bad frequency
We've got, we've got, we've got bad frequency
We've got, we've got, we've got bad frequency
We've got, we've got, we've got bad frequency

Maybe I can talk to you
And you can respond to me
I just hope we understand
Even through bad frequency

Maybe I can talk to you
And you can respond to me
I just hope we understand
Even through bad frequency

We've got, we've got, we've got bad frequency
We've got, we've got, we've got bad frequency
We've got, we've got, we've got bad frequency
We've got, we've got, we've got bad frequency
