No smoke without fire
When will you ever learn
That's what you said to me
Bigger the head that turns,
I say, maybe he's happy
So quick to fire, never a liar in honesty

It's hinged on a stranger thing
Than friends or enemies
From where comes the song I sing
Anger in harmony

Could he be in love again?
You know that she's got the touch
The thing is we're just good friends
Smoke without fire don't mean too much
Your trigger finger's itching on your loaded tongue

But it's hinged on a stranger thing
Than friends or enemies
From where comes the song I sing
Anger in harmony
