Noise pollution
Mass illusion
Mind corruption
All around

Politicians
Sacred missions, stop!
How can we live with it all around?

Step back!
Give it all a thought

All lies won't deceive us
All cries can't convince us
We'll fight and a new world
Will arise

Prejudice

Compassion pleas
And lack of justice
All around

False religion
Blind ambition, stop!
How can we live with it all around?

Step back!
Give it all a thought

For so many years
All we had were fears
As a guiding line
Now the time has come
Wait no more
