Tonight you will on my wings  
Tonight I shall silence your screams  
Tonight my holy crusade begins  
My divine presence wakes you from your dreams

Fear not of this bombs they will bring you peace  
Fear not of this flames they will set you free

I shall embrace you with my fire  
Caress you with smoke and devastation  
Those are not your bridges burning  
But my heavenly touch, holy desecration

Fear not of this bombs they will bring you peace  
Fear not of this flames they will set you free

I am your Angel  
Merciful Angel  
God of death, blood red skies  
Merciful Angel  
For peace and justice, bleed, rot die!
