

Wolfchant "Winterhymn"

This is the nature's
Cold and powerful skin
Consecration
This is my unique ode
My winter hymn
Deep in the forest
I am still alive

Cold winds are blowing
Fast trough the night
I'm in the forest
So deep and alone
The snow is sparkling
In the white moonlight
Oh Mother Nature
A wolf is coming home

All the tress tower
Above me so high
And I am surrounded
By the mountains
I feel the pureness
Of the winter's ice
Embraced from
Wilderness and silence

This is the nature's
Cold and powerful skin
Consecration
Comes this night
This is my unique ode
My winter hymn
Deep in the forest
I am still alive

Ein Wolf streift durch die eiskalte Nacht
Zu entfachen ein Feuer, Ein Feuer st?rker
Als es jemals ward gebracht
Weil es von G?tterhand gemacht
Diese Flammen brennen
So heiss und so stark

Schliessen dich ein mit ihrer Kraft
Sie werden dich fesseln mit ihrer
Schönheit und Macht
Bis sie dir die Freiheit verschafft

All my thoughts I leave free run
I'm surrounded by the mountains
So high and wonderful they guide me
Through the path of my
Inner pacification

The sun is slowly disappearing
All is covered deep red like blood
I feel the world is going to change the face
Back to the roots of our old gods

This is the nature's cold and powerful skin
Consecration comes this night
This is my unique ode my winter hymn
Deep in the forest I am still alive

Cold is the wind and the snow in this night
Embrace my heart with pure ice
The Blood is running cold through my veins
And I lift up my mind to Valhalla
