

Wolverine "Leaving Yesterday"

Visit "[Leaving Yesterday](#)" on MotoLyrics.com

The truth in your eyes promised me
A life far away from yesterday
In you I see the future...
In our special place we will build our own dream

You're the moon in my deep blue sky
Through the darkest of nights
Your light spreads across my land
On my fields we'll stand hand in hand

Oh, so we are both night and day
We'll watch the winter snow unite with the summer rain
During times of our yesterday we will find a way to look
ahead
Through the darkness, our past darkness, we will stand
hand in hand
And we'll be there together as one...

Come with me and leave the rain behind, I will carry
you
Sheltered by our love we'll leave yesterday
Time won't exist as we're heading for an eternity
Flying through the unknown skies painted in the beauty
of you and I...

Breathing a pleasant silence tonight
The sound of your breath carries the light
You're what I was put here for
And finally I know just how to smile

You're the moon in my deep blue sky
Through the darkest of nights
Your light spreads across my land
On my fields we'll stand hand in hand
Our love will be our lifelong map
And our road will lead us to eternity...

Come with me and leave the rain behind, I will carry
you
Sheltered by our love we'll leave yesterday
