You never loved me,  
Only lied to me  
Never cared for me (x4)

Now the truth comes out  
I find out how you really felt  
But did you ever consider me,  
And all of my feelings?  
It never mattered at all  
You only wanted what was best for yourself  
Now your blade sunk in,  
My back slit wide open

I made myself vulnerable again  
So if this is how it's gonna be,  
Just remember what you did to me

You never loved me,  
Only lied to me  
Never cared for me (x4)
