Da, da, da

I'm sittin' here and don't know what to do
Just sittin' here and don't know what to do
There's nobody here I could ask how to do
Just me and myself and nobody else
Although you're not, you're not here with me
I can hear your voice, speakin' to me
And when I close my eyes I can see your face
I know exactly what you're (just) about to say

Chorus:

And if I just write 'bout what's going on inside
Like you said I should try
Right from the bottom of my heart
And if I just write 'bout what's going on inside
What I have on my mind
Right from the bottom of my heart
Then there must be one more song for you
Must be one more song for you

Da, da, da

It seems that I'm sittin' here now for days
Already now I feel their critical gaze on me
What would I give for just one damn word
But it's just me and myself and nobody else

Chorus:

So if I just write 'bout what's going on inside
Like you said I should try
Right from the bottom of my heart
If I just write 'bout what's goin' on inside
What I have on my mind
Right from the bottom of my heart
Then there will be one more song for you
Will be one more song for you
Maybe it's the way you look at me (look at me)
Maybe it's the way your smile makes me feel (make me feel)
Maybe it's the way you walk beside me (makes me)
Well something, somehow makes me so sure
Well something, somehow makes me
Wanna just write 'bout what's goin' on inside
Like you said I should try
Right from the bottom of my heart

If I just write 'bout what's goin' on inside
Like you said I should try
Right from the bottom of my heart
And if I just write 'bout what's goin' on inside
What I have on my mind
Right from the bottom of my heart
If I just write 'bout what's goin' on inside
What I have on my mind
Right from the bottom of my heart
Then there must be one more song for your
Must be one more song for you
Will be one more song for you
Should be one more song for you
This is one more song for you
Ooh god are you sure that I deserve it
Ooh god I don't care if I deserve it
But let there follow, but let there follow
So much more
I'm sure there will follow, I'm sure there will follow
So much more songs
Da, da, da
