

Wooden Circus "Solution"

Visit "[Solution](#)" on MotoLyrics.com

Won't you come with me
I know a place we can run to and be free
Come on and see
We'll scale these valley walls
Rise above it all and watch this world revolve
These arms slow reachin'

I think I found a solution
I think I found a solution

Open up your eyes
While the sky's still clear
You will spread your wings
And fly away from here
And if along the way
This great sky turns gray
I'll be the guiding hand
To help you understand what went wrong

I think I found a solution
I think I found a solution

Just the other day I passed a girl
With the sunlight in her eyes
Never felt so alive
No headlights for pages or minimum wages
Just the fact that love is all you really need
To set you free

I think I found a solution
I think I found a solution

Take my hand
Say you will come
And if only you would come

I wanna take you there
I wanna take you there
I wanna take you there
I wanna take you there
