[Verse 1: Woodie]

Feel the weight on my shoulders, put yourself in my shoes

Before you pass judgment upon the choices I choose
I'm just a man with a gun in hand protecting what I love
With a deadly alter plan to persevere and stay above
Cause at any time the walls can come tumbling down
And knock you off the top of the ladder back down to the ground

And now you're back to point A with a strike against you
And society don't like you though they might pretend to
It ain't right what men do but dam it's reality
And I'ma do the best I can to not become a casualty
And stand up for my faculty at any time required
Hammers cocked back gripped the devil ain't getting fired

Just another buried sin till my life comes to an end
Lost my feeling for remorse around the age of nine to ten

Then gave up half my soul when I lost my closest friend
To his brother who went from youngest to oldest then

[Chorus:]

Everyday and every night of my life!
My sanity is standin' on the edge lookin' over the ledge
While mama prays I fight to keep my mind right!
Sleepin' with my lead under my head quick to hop out the bed
And point and aim at every noise in the night!
Pacin' my house 'til sunlight in my armored vest,
boxers, socks and cortez
Been infected by life's poisonous bite!
Since I left a man spread, full of lead, fled and left him for dead

[Verse 2: Woodie]

Show a little mercy Lord
You did drop us in the middle of some dirty wars
I know lucifer but still I give my love to you
Please understand my actions stem from what these judges do

In '98 when blackbird died yeah I cried
In '99 again I cried after Raymond died
For several years shed so many tears they dried up
Pain manifested to anger that keeps me fired up
Yeah I smile and crack jokes when I'm with the homies
But when alone I'm in a zone where few would wanna
know me
I'm murder prone every time I step outside my home
Law enforcement I despise make 'em taste their own
Bad medicine they force on citizens everyday
Kidnap 'em, lock 'em in a cage watch 'em beg and pray
Humiliate 'em strip 'em butt naked bend 'em over
Make 'em cough 4 times for the fallen soldiers
Use their billy club to break their bones how they do us
Then shock 'em with their tazer gun while restrained in
cuffs
Pepper spray their eyes blind and their throat 'til they
can't breathe
Then let 'em die slowly knowin' that they can't leave
To finish up use their own gun to shoot 'em in the gut
Releasin' acid from their stomach that'll eat 'em up
And to anybody questionin' my way of thinkin'
Obviously haven't smelled the death these demonz
reepin'

[Chorus:]

Everyday and every night of my life!
My sanity is standin' on the edge lookin' over the ledge
While mama prays I fight to keep my mind right!
Sleepin' with my lead under my head quick to hop out
the bed
And point and aim at every noise in the night!
Pacin' my house 'til sunlight in my armored vest,
boxers, socks and cortez
Been infected by life's poisonous bite!
Since I left a man spread, full of lead, fled and left him
for dead
