Drag that fuckin' weight man,
Drag that weight and breathe
Pull that fuckin' anchor across the rocks, push that
mountain into the sea

Drag that Weight! Over Foreign Landscapes! Drag that
Weight!

Like a 10 ton stone statue, standing before miles of
mountains
In a foreign land, where you don't speak the language
there

I feel so heavy man... So I drag that weight!
And I drag that weight over foreign landscapes

Slow and heavy!

Drag that fuckin' weight man,
Drag that weight and breathe
Pull that fuckin' anchor across the rocks, push that
mountain into the sea
