Please leave all criticism outside the door  
I dont have time for all these problems  
I gave you a chance and you blew it  
And now im leaving you

This is the end

I need a big dose of freedom and self esteem  
I need some time to relax and stop listening to you x2

Shake it off, shake it off  
I need to get away from you  
Stop putting myself down, stop putting myself down  
Shake it off shake it off,  
I need to get away from you  
Stop putting me down stop, putting me down
