How can we become responsible
When our government mediates and we no longer talk
to each other?
How can we become responsible
When we accept compensation as a way to say happy?
Now, this isn't happiness, it's impersonal and cruel,
Far worse than any monarchy.
How can we become responsible to control,
Participate, and think about activity?
Our actions are equivalent to our freedom.
Our actions are controlled by doing something new;
Innovation, motivation, unpredictable interaction.
I don't want to be your instrument.
These thoughts you can't predict
And they motivation, unpredictable interaction.
I don't want to be your instrument.
These thoughts you can't predict and they won't be
regulated.
I don't want to be a part of your white lies.
I don't want to be your instrument
And perpetuate ruling class economics for you.
I don't want to be part of you white lie.
Stop thinking so instrumental.
Start thinking about you future.
