Go on leave town
We can all leave town
We can pack our bags
Hitch a ride
Burn new places down

A friend once said
You try harder in the end
You start dressing up
Looking good
It all starts over again

And by that time you might not mind
The face in front of you

Go one grow your hair
Do a line or two
And never wonder how I am
I'm fine and how are you

It's better not to know
And it's better not to ask
That's what I've been told
A million times
A million times over again

So go on, go on
And make my year
Much brighter than you already have
