Every day, Every Night
I find myself dreaming of all the things I might
do to you, and do for me
behind closed doors where nobody else will see

I know when i get you alone
There's gonna be trouble
Just hope that i don't lose control
I'll have you seeing double

fantasies and dangerous dreams
all have my head spinning in a world of schemes
what to do when it's up to me
Take you places you have never seen

Chorus

I know when i get you alone
I know when i get you alone
I know when i get you alone

All my life they told me i'm wrong
I thought they were right, but then you came along
I finally believe, and now I can see
I was right all along, and it brought
you to me

Chorus
