Keep your head above the water, just long enough.  
A current breaches a so called reef.  
I won't be let down or fall away; no chance, not today.  
Things will change; I'm just waiting for an S.O.S.

Hold my hand and lead the my way,  
I'll falter, but at least, I know that you're here to stay.  
Hold my hand to your heart, I'll keep;  
A constant reminder of how to find my way;  
Back out of the dark and back to you.  
You're my saving grace.

(Things will change...) [4x]

Oh we're drowning, but there's a ship on the side of  
me,  
Throw out the captives, leave that man be.  
Wait for the sign, forgive; forgive.

And don't hold the value of life against us.

A dead silence rings out, a call to all of those in doubt.  
A brilliant light leads me home.

Hold... [4x]  
Hold my hand and lead my way,  
I'll falter, but at least, I know that you're here to stay.

Sacrifice yourself!! [3x]

Turn around, turn around; lay it down now,  
Turn around, turn around; back down.  
Turn around, turn around; lay it down now,  
Turn around, turn around; back down.  
Turn around, turn around; lay it down now,  
Turn around, turn around; back down.
