Slow skull embodiement  
Emerge to my faded mind  
Altered emotion of impurity  
People are septic to my  
Misanthrotheories  
Let me roar Eurl!  
Feel the utter evil  
Oh ... that's trully black metal  
Alone in the depths of solitude I lay  
Their cancer attacks a part of my crisis inside  
Oh fall shadows, fall... belong the waves  
Replace my mind, with a normal human one  
Desperate  
Misanthrope,lonelly world carbonize my thoughts  
Humanity pays:  
Every hour they're trying to give meIn a followers  
mould, blessed  
Lord confess it  
Jesus's suffering, three days on the cross  
I'm just twenty two, why so long a coste  
Machines won't (let go) nature go  
God's ways...  
In silence  
I denounce:Life of harmony is a pledge to be  
Doomsday hours alleviate slowly the carrion's path  
This call is for me -  
Allowance times arrives-  
Sign the Obituary of Misanthropy  
Take my hand -Slowly-  
Pulls is unhuman  
Present  
And see differences between the past & present  
Future  
Time keeper memorize the ...  
Past  
Operation dissect my gated's compressed mind  
Brain changing necessity  
Human's system, security
