### "Mind Building"

Directly inspired by a neo-New-Age thought. Finally, it's time to progress and to reach our spirit. These few statements are just an approach, a call to reason. Let's leave this body.

### "Paradoxical Burial"

The misanthropic vision of this social fact, which is a burial. Rites practiced by each civilisation. Here, isn't a place for criticism but a sincere remark.

### "Unsubdued Redemption"

This is the mature thought made after the separation of the Misanthrope and mankind. Restatement over a past and a future. Why did we lose the power of hopeness living in harmony with the others? Where can we turn around henceforth? Difficult choice: the end or the infinite? These are the only alternative to the madness.

### "Blaspheme The Earth"

Hopeness to be able to reborn in a world where misanthropy would not rage. Before this is it is inside us and it pushes to be psychological revolt. We can't practice violence, but on the other hand we have inside us hatredress.

### "Hater Of Mankind"

Being in a world which doesn't accept us as human beings we are obliged to riposte, making a plunge into misanthropy. Now and till the great change we will be: hater of mankind.
