California with a busted headlight  
Here we are dancing in the twilight  
So just close your eyes  
Cause we're still alone  
When the sun goes down  
It's too late to go home and you say

Where has love gone now?  
Where has it gone?  
Where has it gone?  
Where has it?

It's living in the arms around you  
So don't let go  
I never wanna live without you  
I think you know if we run tonight  
We can go to the other side  
Keep a souvenir of a desperate year  
I'm never gonna make it alone

Mexico the war is on the radio  
Border lights casting endless shadows

Where has love gone now?  
Where has it gone?  
Where has it gone?  
Where has it?

It's living in the arms around you  
So don't let go  
I never wanna live without you  
I think you know if we run tonight  
We can go to the other side  
Keep a souvenir of a desperate year  
I'm never gonna make it alone

Miles goby they fly  
They won't separate us  
By your side I won't disappear  
I won't disappear
