

Xandy Barry **"Refugee"**

Visit "[Refugee](#)" on MotoLyrics.com

I stumbled in a haze
Walked the streets for days
Past the church steps they won't carry me
I can see a distant light
But it came at such a price
Wear a mask like it's Halloween
Search the hills for the drug I need

Maybe you can save me
From what I've become lately
Take me there to another place
Show me love, just a taste
Maybe you can save me
I feel just like a refugee
Empty in my heart
A shadow in the dark
About to come apart

Can you see it in my eyes?
There's a part that's still alive
But the day is long and it's almost time
On a bridge where horses ride
When the moon begins to rise
Like a bird with a broken wing
Noah's rainbow out of reach

Maybe you can save me
From what I've become lately
Take me there to another place
Show me love, just a taste
Maybe you can save me
I feel just like a refugee
Empty in my heart
A shadow in the dark
About to come apart
