"Eight Is Enough"

Visit "[Eight Is Enough](#)" on MotoLyrics.com

There's a magic in the early morning we've found
When the sunrise smiles on everything around
It's a portrait of the happiness that we feel and always
will
Eight is enough to fill our lives with love
Oh we're lucky we can share this beautiful stage
So many find the world an empty place
Anyone who asks to stand alone is always standing still
And eight is enough to fill our lives with love
Oh love makes all the difference now
And one that really shows
Just look at everyone of us
See how it over flows
We spend our days like bright and shiny new dimes
If we're ever puzzled by the changing times
There's a plate of homemade wishes on the kitchen
window sill
And eight is enoguh to fill our lives with love
More than enough to fill our lives with love
