Along the edge of this airfield
The old prop-shaft airliners stand
Altimeters reading zero
Formless memories lingering

Nights are cold on this airfield
I sit alone and watched the radar
Locked on the wavelength
Caught in the beep
Falling slowly into the screen

Every day that you wait
Is one more that you lost
When you wake up
I see you there on display in lights
A final point of no return
Taking us there from here

And we can fly from here
And we can fly from here
And we can fly from here

Into a sky that's clearing
Look back, we'll dry the tears
For those once held so dearly
And love will never disappear

Along the edge of this airfield
The old prop-shaft airliners stand
Altimeters reading zero
Formless memories lingering
Lingering, lingering, lingering

And we can fly from here
Into a sky so clearly
Look back, we'll dry the tears
For those once held so dearly

And we can fly from here
And we can fly from here
And we can fly from here

And we can fly from here
And we can fly from here
On the understanding that we can fly

Every day that you waste
Is one more that you've lost
On display in lights
A final point of no return

Every day that you waste
Is one more that you've lost
On display in lights
A final point of no return
