Once a book attracted  
My attention not too long ago  
It said the future would reveal a way  
The reading book which pleased me  
Reflected days we dream about  
And now it seems those days are drawing near

And have you seen the order  
And the parting of the older ways  
The sky has never been so high before  
The minstrel tunes his pleasure songs  
The sounds proclaiming the new age  
It's time the news was free for all to hear

Have you seen the order  
And the coming of the golden age  
When all our hearts  
Will know the everlasting days  
Love will pour throughout the land  
As never known before  
The meeting of the ways

Is the dawn  
Is the dawning of the golden age

You and me time feeling  
In the morning light  
Getting it together  
Does it feel right?

Let us be together  
In the morning light  
Let us be together  
In the dawning light

Let it through  
Let it through  
Let it through

Have you seen the glory  
And the coming of the golden age

When all our hearts  
Will know the everlasting days  
Love will pour throughout the land  
As never known before  
The meeting of the ways

On this day  
On this day of days

La la la la la la  
La la la la la la  
La la our? is  
Falling
