See the searching, see the people
See the searching, see the people
See the searching, see the people
See the searching, see the people

See the searching, see the people
See the searching, see the people
See the searching, see the people
See the searching, see the people

Out in the darkness and soul searching
Did you find what we had lost?
All this time I've got to thinking
About the promises

How long this energy of winter?
How many times that we could never love?
How many times is time enough?

All the foolish notions
When we'll die that's all that is
We can never really understand
The broken promises

All along we run together
All along we run, we run as one
When you find a perfect union
You've got to follow it

Stop that reasoning
(You've got the answer)
You got to stop that thinking out loud
(You've got the answer)

Go where your heart takes you to
(You've got the answer)
You're not that innocent, you've been around
You're not that innocent

Got to be right, got it coming to you
How many times is time enough?
Got to be right, got it coming to you

How many times is time enough?

Your time is just beginning
Out of all where we came from
Holding on, This point receiving
There it is, there it is, there it is

Holding on, can you remember?
Holding on, was it ever like this?
Holding on, it's the most important thing
Holding on

Holding on, can you remember?
Holding on, was it ever like this?
Holding on, it's the most important thing
Holding on, holding on

It was the first time that I saw you
It was the first time that I knew
Out of all my disbelieving
Holding on, I was holding you

Holding on, holding on
Holding on, holding on
Holding on, holding on
Holding on, holding on
Holding
