I would have waited forever for you to return into my
life

I would have waited forever, I would have given you
everything I had

I would have waited forever, there's no question, no
question at all

So true in the prize, would you wait for me?

All because you got burned, so you took what you
needed

Some will always turn away, say it's reason enough
It's another game of exploration

Something calls at reverse and it comes to you

Experience everything as it comes true

So it will be then

Change, it will happen

See that we feel it

All is completed

Don't you want the world to stop short of giving?

Anytime of night or day, the magic things you love

Everybody hurts when you shout, when you walk away

Talk about it leaving, talk about it, talk about it

according to you

I would have waited forever for you to return into my
life

I would have waited forever, I would have given
everything I had

I would have waited forever, there's no question about
it at all

So in between the perfect flame of you

This love will never let you down

Just take it as it comes

For everything will come around

So it will be then

Change, it will happen

See that we feel it

All is completed

You put your hand up, stop the flow of where you're
going to
It's another game called exploration
How we imagine everything that we think we're going
through
It's another reason we make the break

Everyone will move with you now to the riverside
Experience everything but don't let the land slide

I would have waited
I would have waited forever for you to return into my
life
I would have waited forever, I would have given you
everything I had
I would have waited forever, there's no question about
it at all

So in between the perfect flame of you
This love will never let you down
Just take it as it comes
For everything will come around

I would have waited
I would have waited forever for you to return into my
life
I would have waited forever to give you everything I
had
I would have waited forever, no question in my body
and soul
Forever
