I order theme

(anderson / howe / wakeman / bruford)

Instrumental

li rock gives courage

(anderson / howe / wakeman / bruford / lawrence)

You don't need anybody, don't you give me that
surprise

Everything about you inside your eyes

You don't need anybody in your family ties

You crossed over the river

You don't need any money to deserve all your friends

It's just the love you give them

You don't need anybody in this complicated life

You crossed over the river

And you're there on your own and you're lost in your
life

And you think there's someone's gonna make you feel
so good

You better lose control you better watch your step

For there's something inside you, they call it

Rock gives courage, a way to win the trust

Rock gives lover a way to win or bust

You don't need anybody in this complicated life

You crossed over the river

Rock gives courage, a way to with the trust

Rock gives lovers a way to win or bust

Rock gives sisters a way to speak their mind

Without this gift of rock and roll

We'd all be wasting time

lii it's so hard to grow

(anderson / howe / wakeman / bruford)

They say we've got it made, they say we gotta light

Where is the man with all the great directions

They say we gotta win, they say we gotta learn
But in the end it's just the same damn reason

They say you've gotta run, they say you gotta jump
Don't really need to know which way we're going

They say we gotta push, they say we gotta shout
Is this the way to keep our bonfires burning

Sick feeling, sick reasoning, sick challenge you la la la
la
You can't imagine it, how hard it is to grow
You can't imagine it, can you imagine

The order of the universe

You don't need anybody, don't you give me that
surprise
Everything about you inside your eyes
You don't need anybody in your family ties
You crossed over the river

You don't need any money to deserve all your friends
It's just the love you give 'em
You don't need anybody in the complicated life
You crossed over the river, you crossed over the river
You crossed over the river, you crossed over the river

Iv the universe
(anderson / howe / wakeman / bruford)
The order of the universe
The order of the universe
