Bozzio/Bozzio)

There's nothing you can do, what they tell you isn't true

Can't find any answers

And then who do you trust, protect yourself you must

Should you be getting involved

It's getting so involved, it's getting so involved

Is this some foreign game, are they the ones to blame

Will you ever find out

Do you really want to know, could you continue if it
shows

You're not as right as you think you are

Are you right or are you wrong

Are you right or are you wrong

It isn't making any sense

Must we use the ultimate defense

Or watch the dominoes around us

All fall down

The situation's pressed, all you do is guess

They've got you into a corner

While all the others thrive, by spreading 'round the lies

You can't let it get to you

You can't let it get to you

You can't let it get to you

All the things that people say, obstacles put in your way

Don't let them make you quit

When your back's against the wall, and no one hears
the call

You've got to fight for yourself

It isn't making any sense

They'd like to think that you believe the things you read

Must we use the ultimate defense

The picture that they paint is an illusion

Can't let the dominoes around us all fall down (repeat
to end
