Gotta talk to you, make the move  
Warm sun, It's still a cold day  
With the stars above, spent some time away  
A different moon, but still the same old day, it's  
broken, leavin'

I can see without you babe  
Witness your life another way  
I can live to break the bond  
And start this new free day

The rain that falls, the free for all  
The drops of sound, make everything right  
Cold and soaked, down to the bones  
Peace comes, more to me right now, livin', breathin'

I can see without you babe  
Witness my life another way  
I can live to break the bond  
And start this new free day.
