Light it up and watch it all fade out  
your hope of getting away  
did you really think we'd scare so easily  
(wolves like him have trained for ages, lines like mine  
have moistened faces)

we'll be out in force tonight  
so dye your hair and avoid the spotlight  
for your own good, i think you should

!!get out get out get out get out!!  
the fire's burning,  
don't just stand there watching your escape go up in  
flames  
!!get out get out get out get out!!  
before it's too late  
because engulf is not a synonym for second date

save yourself darling, there's no point in running  
all the traps are set  
why would you ever think we'd play the game that fair?  
(sharks like me swim under the surface, with charm like  
his my lines are worthless)

we'll hunt you down in broad daylight  
no witness to your heart tied tight  
this is for your own good, i know we would

!!get out get out get out get out!!  
the fire's burning,  
don't just stand there watching your escape go up in  
flames  
!!get out get out get out get out!!  
before it's too late  
because engulf is not a synonym for second date
