

Young Bleed

"Flying Away"

Visit "[Flying Away](#)" on MotoLyrics.com

It sounds like irony
Someone said give peace a chance
History has shown that it is
A foreign word

Oh
Is it a way to save this world
To stop the Earth from bursting
Six billion people seems to be too much

NO
This will only hasten judgment day

I'm awake at night
And saw the need to fight
And the helping hand is so far out of sight
We need to fly away
This is no place to stay
For we know now that the evil's gone away

It works like a domino
If someone falls, they all will follow
When someone rules
They all obey

Oh
With every war, with every disease
Maybe we're just trying to survive
Maybe this is the way that we'll

GO
This is not the way it's meant to be

I'm awake at night
And saw the need to fight
And the helping hand is so far out of sight
We need to fly away
This is no place to stay
For we know now that the evil's gone away
I'm awake at night
And saw the need to fight

And the helping hand is so far out of sight

Oh

Is it a way to save this world
To stop the Earth from bursting
Six billion people seems to be too much

NO

This will only hasten judgment day

I'm awake at night
And saw the need to fight
And the helping hand is so far out of sight
We need to fly away
This is no place to stay
For we know now that the evil's gone away
I'm awake at night
And saw the need to fight
And the helping hand is so far out of sight
We need to fly away
This is no place to stay
For we know now that the evil's gone away
HEY!
