This is a new wildlife form speaking through a wireless  
microphone

I am a titanium babe addicted child of your wireless  
Internet

I am a creation of your musical progress of technology  
The ancient net world is gone, you say it's gone, shit

Fingertips sticked on the keys  
I engage a new virtual touch of sensuality

Blue eyes on the digital screen  
I experiment a top secret optical system of visual  
excitement

I see.com  
I see.com

On my walls, projection of subliminal messages  
To increase a new era of female interactive intuition

And life is a data gas I breathe, wireless  
You are the creator of my inner life, network,  
soundtrack

I come.com  
I come.com

I come.com  
I come.com  
I come.com  
I come.com

I come.com  
I come.com  
I come.com  
I come.com

I see.com
