### "The Alchemy Between Us"

Amid the cold lines of the city  
lay down your head  
To quiet all the sadness  
To feel what's possible instead

your Grace  
I think I found the perfect way  
To explain it  
Close your eyes  
And move  
Within the alchemy  
Between us

Can alchemy sustain us  
While the world, it falls apart?  
This instinct keeps us searching  
a cure for broken hearts

You grace  
I think I found the perfect way  
To explain it  
Close your eyes  
and move  
Within the alchemy  
Between us
