Judge and sentence the findings are fake
Commission your thoughts, commission your thoughts
To punish the world who can't just happen- wait
Can't just happen- wait, can't just happen- wait
Out manoeuvre, emotion resent
Your pathways and footprints are made with intent
So we stand frozen in contraband
Like courage we break from emotional hand

They will march on, they will march on

They say how we feel...

Take your eyes from the crow
They'll stop you from distance
But the thorn in my side is immune to resistance
It can't just happen, it can't just happen
It can't just happen, it can't just happen

They will march on, they will march on

Try breathing twice
Do you free the most to see them through?
There's your chance but you gave in
I will stop the most wars
Saw that you was me all calm
And I was called but it's all mine

They'll remove your emotion with sense
The pathways and footprints
Are made to change the way in all diversions
So I stand frozen
